Previous Employers

- Yash Technologies (current)
- Dynamisch IT
- NeoSoft Technologies
- Azuga Telematics
- Zycus Infotech
- Infosys

Work detail breakdown in previous offices

Yash Technologies Private Limited Sept 2025 - present, Pune, IN.

- Working as Full Stack Lead for a well-known pharmaceuticals client based in Europe, on Electron v28 for a windows app
- Currently using React, NextJS, along with Vite, Husky, Github checks, CI/CD pipelines, and SQLite
- Maintaining code constraints and quality
- AI bot development and integration to help user use complex features via voice and natural text, with Gemma-3 4B params model (.gguf) deployed on LMStudio locally

Dynamisch IT Private Limited Aug 2023 – Sept 2025, Pune, MH, IN.

- Worked on a legacy healthcare project created in **Angular 8** and upgrading it to **Angular 16**, adding adaptation of new library, reducing usage of Redux and upgrading, Webpack for more optimized build and splitting modules into separate CSS and JS files
- Started a new project for dashboard of a persisting app, used to manage hiring in the client company, in **ReactJS**
- Another healthcare software using **ElectronJS** with ReactJS, SQLite, SQL **AES256** cipher and quick deployment using CursorAI coupled with GPT4o and Claude Sonnet 3.5
- Started a **new ReactJS Project** of healthcare field, sat up architecture and delegated work
- Creation of **CDNs** for Login-via-Google like distribution of app components (not micro frontends)
- Efficient **Webpack 5** integration for on-demand packing with size reduction, optimization, CSS Extraction and frontend security
- (personal level) **Integration of LLM** on local project with indexing using Chroma DB and making query bot accessible to developers

NeoSOFT Technologies Jan 2022 to Feb 2023, Noida

- Creating **Microfrontends** for multipurpose usage
- Working with UX and testers for betterment of product
- Assigning work, **presentation** of the sprint, scrums and improvement sessions
- Creating reusable UI components, architecture of MFE and communication with shell apps
- Compiling work of different team and git management: PRs and updates

Azuga Telematics – March 2020 to July 2020 Bangalore, IN

- **RxJS** Forms validation, CRUD operations display and management
- Ad Banner Web template for not-yet-purchased features based on permissions

Zycus Infotech – Dec 2018 to Jan 2020 Bangalore, IN

- Lead UI Developer of one of the core products of the company on **Angular** platform. · Translation settings multi-languages
- Work distribution, compiling and pushing work among subordinates
- UI component design and brain storming.
- Design development and programming.
- Development of loading icons and animations
- Fixing UI issues
- API creation using Node JS and Mongoose

A note to potential employer: Due to a certain dispute in the past, the above company did not provide me with an experience letter; everything else is documented, including EPF details guaranteed by the government of India under government EPF scheme as a proof of employment.

Infosys Infotech – Feb 2017 to Dec 2018

Mysore, Chennai, Bangalore, IN

- Maintenance of Server
- Front end development of a shopping site (beta)
- Message reprocessing via IBM Integration bus and IBM MultiQueue
- Message flow deployment
- Automation on Linux serve
